## Stomach Feeder Lamb/Kid

205 943 ~~\$11.95~~ **\$9.95**

For administering emergency colostrum or electrolytes direct into the stomach, using a 60ml syringe and a 35cm x 16Fg PVC stomach tube. Tube is specially made with side delivery ports to ensure safe flow into the stomach. Use with care.

## Lamb Reviver Roslam

complete 204 213 ~~\$34.95~~

The Roslam reviver is extremely safe to use, feeding colostrum, electrolytes or artificial supplements direct to the stomach. A feature is the special soft stomach tube, which does not get stiff in cold weather, and thus does not cause damage to sensitive tissue in the young lamb's throat and stomach. Open ended bottle capacity 120ml, marked in 30ml graduations. Feeding tube is 42cm long.

## Lambing Rope Lightweight Pair

209 915 ~~\$22.95~~ **\$14.95**

Lightweight 4mm dia. nylon rope with eye splices both ends, sealed for durability. Length 1.5mm o.a. Supplied as a pair (two ropes).

## Lambing Aid String Snare

204 217 ~~\$14.95~~

Useful tool for assisting lambing, calving hinds, or other small animal births. Snare can be put over head or leg, pulled tight, then lamb pulled gently out. A simple trouble-free device. Plastic and nylon for long life with no maintenance. Length 37cm o.a.

"Oh, sure, sometimes I feel a little guilty but you have to admit, when it comes to seat covers, nothing beats genuine sheepskin."

## Vaginal Tape Jorvet

18m 206 965 ~~\$42.95~~

For tying-off the umbilicus, or suturing vaginal prolapse. The Jorvet tape is braided polyester, 3mm wide x 18m long, easily extracted from the resealable plastic pottle. This is the finest of our vaginal tapes selection and also the most economical.

## Vaginal Tape Bovivet Ewe

5m 207 030 ~~\$19.95~~

For suturing the vulva to treat vaginal prolapse. Procedure causes little trauma for fast recovery. Easy-to-use transparent tape dispenser. Tape 4mm wide x 5m long.

## Vaginal Tape Needle

20cm 207 034 ~~\$19.95~~

Specially made vaginal suture needles suitable for ewe prolapse suture, using tapes as above. Use with care. Discuss procedure with your veterinarian. Quality version is sharper, finer and easier to hold with wet hand.

## Vaginal Suture Needles

13cm 12-pk 207 631 ~~\$49.95~~

Big, sharp, double-curved suture needles ideal for use with our umbilical or vaginal tapes (see this page). Needle eye is 6mm long x 1.4mm wide. Needles are 13cm (5") long. Supplied in 12-pack only.

## Vaginal Prolapse Pin Ewe

5-pack 209 879 ~~\$10.95~~

Specially made stainless steel pins for closure of vulva after vaginal prolapse replacement. This method can be quicker and easier than usual suture methods. Pin is 7.5cm o.a. with 4cm clear shank. Thoroughly wash and disinfect the vulva area, and the pin, before use. Consult a veterinarian for advice.

## BEARING RETAINER....

## Farmhand™ Ewe

4-pack cpt 214 756 ~~\$12.95~~

This support is used to help prevent prolapse before or after lambing. Once inserted into the vagina it can be tied to the fleece to retain. Or use a piece of old baling twine, to secure in place with a loop around the front legs (under neck) and back to the retainer. Even when used prior to birthing, the exit of the lamb will push the retainer clear. Sterilise and use a lubricant before insertion. Pack of 4 supports complete with tie tapes.

## Protainer™

4-pack 214 754 ~~\$12.95~~

Bearing retainers of this type, for use in cases of vaginal and uterine prolapse in ewes, have been around for many years. Usually they feature tie strings or tape for securing the retainer to the wool of the ewe. This can be a tedious process. We have developed the 'Protainer'. This tool features locking clips at each end which are clipped onto the wool. Protainer is applied in seconds, is 100% secure, and is easily removed. Registered Design No. NZ416420.
